

# Projet de maraîchage Biologique

## ➤ Description du projet :

La commune de CHÂTEAUBERNARD entame une réflexion en 2021 sur l'installation d'une production en maraîchage biologique.

L'ensemble du projet est construit avec l'aide de la MAB, le collectif Mangeons Mieux et la collaboration de la sous-préfecture de Cognac, de la DDT notamment pour la réalisation d'un forage.

L'exploitation des terres sur environ 5 hectares permettrait d'obtenir à terme une production estimée à 45 Tonnes/an.

Les débouchés pour la vente des légumes pourraient être :

- consommation en restauration scolaire
- vente à la ferme
- magasin de producteur,
- magasin spécialisé en agriculture biologique,

# Rien n'est impossible pour Châteaubernard, lorsque nous parlons d'améliorer la restauration scolaire !

Pour rappel :

Au 1<sup>er</sup> Janvier 2022 la loi EGalim obligeait à 50% de produits labélisés dont 20 % de bio !

Objectif atteint pour les restaurants scolaire castelbernardins 

Légumes bio ok, mais venant des 4 coins de la France et d'Europe. 

Les lois se cumulent, nous vous rappelons la loi « Climat et résilience du 22 août 2021 » avec comme objectif la réduction des émissions de gaz à effet de serre de 40% d'ici 2030.

**STOP aux transports inutiles !**

La commune a décidé d'examiner la possibilité de produire en régie les légumes nécessaires à la restauration scolaire.
